Work Experience

Virginia Farm Bureau Family of Companies

QA Analyst

Oct 2023 - Present

- Conducted comprehensive manual and automated QA testing using Playwright and API testing on two system projects, identifying and resolving critical bugs before deployment, enhancing system stability and user experience.
- Coached cross-functional teams on Agile methodologies and JIRA/Confluence best practices, fostering more accurate project tracking and improving key deficiencies in the scrum process.
- Fostered seamless collaboration across business and development teams, ensuring projects met all specifications and were delivered on schedule.
- Performed ETL testing with SQL to validate data flows and transformations, ensuring data integrity across batch and real-time pipelines.
- Developed and maintained a comprehensive QA knowledge base with numerous articles and critical tooling links, effectively reducing onboarding time for new hires and enhancing overall team efficiency.

FAR Consulting, Inc.

Product Owner

Jan 2021 - Jul 2023

- Spearheaded the development of four concurrent product initiatives, consistently delivering projects on time and by aligning diverse stakeholders, internal teams, and external vendors.
- Strategically defined and prioritized product backlogs for a startup, leading to the successful launch of four applications on PC, iOS, Android, and Web resulting in an increase in user engagement.
- Efficiently triaged and resolved critical issues and outages, reducing average downtime through rapid collaboration with development teams and transparent user communication.
- Led user research initiatives and feedback cycles, implementing product enhancements that resulted in an improvement in user experience scores and an increase in customer satisfaction.

Community & Support Manager

Mar 2020 - Dec 2020

- Managed email, Discord, and forum channels to engage users and resolve inquiries, concerns, and feedback, resulting in faster response times and higher user satisfaction
- Created a knowledge base in Confluence that let users selfserve, reducing support tickets and improving issueresolution speed
- Organized and hosted monthly community events and tournaments on Discord, boosting player engagement and promoting the gaming product
- Served as the community's liaison with the development team, gathering user feedback and conveying it to developers, which led to feature updates that addressed user needs

Certifications

- Certified Scrum Product Owner® (CSPO®)
- Technical Support Fundamentals
